

Experiment no.- 5

Steps :-

Open browser

Search docker doc

Get docker

Click on get docker

Select docker desktop for windows

The screenshot shows the Docker Docs website. The top navigation bar is blue with the 'dockerdocs' logo and links for 'Get started', 'Guides', 'Manuals' (which is underlined), and 'Reference'. A search bar is on the right. The left sidebar is a navigation menu with categories: 'Manuals', 'OPEN SOURCE' (with sub-links for Docker Engine, Docker Build, Docker Compose, and Testcontainers), 'PRODUCTS' (with sub-links for Docker Desktop, Setup, Install, Mac, Mac permission requirements, Windows, Windows permission requirements, Enterprise deployment, Linux, and VM or VDI environments), and 'Sign in'. The main content area is titled 'Install Docker Desktop on Windows'. It includes a section for 'Docker Desktop terms' stating that commercial use requires a paid subscription. Below this, it says 'This page provides download links, system requirements, and step-by-step installation instructions for Docker Desktop on Windows.' and provides two download buttons: 'Docker Desktop for Windows - x86_64' and 'Docker Desktop for Windows - Arm (Beta)'. A note mentions that for checksums, users should see the 'Release notes'. The 'System requirements' section has a 'Tip' icon and the heading 'Should I use Hyper-V or WSL?'. The text explains that Docker Desktop's functionality is consistent on both WSL and Hyper-V, but each has its own advantages and disadvantages. On the right side of the page, there are links to 'Edit this page' and 'Request changes', a 'Table of contents' section with links to 'System requirements', 'Install Docker Desktop on Windows', 'Install interactively', 'Install from the command line', 'Start Docker Desktop', and 'Where to go next', and an 'Ask AI' button.

Install Docker Desktop on Windows

Docker Desktop terms

Commercial use of Docker Desktop in larger enterprises (more than 250 employees OR more than \$10 million USD in annual revenue) requires a [paid subscription](#).

This page provides download links, system requirements, and step-by-step installation instructions for Docker Desktop on Windows.

[Docker Desktop for Windows - x86_64](#)

[Docker Desktop for Windows - Arm \(Beta\)](#)

For checksums, see [Release notes](#)

System requirements

Tip

Should I use Hyper-V or WSL?

Docker Desktop's functionality remains consistent on both WSL and Hyper-V, without a preference for either architecture. Hyper-V and WSL have their own advantages and disadvantages, depending on your specific setup and your planned use case.

[Install from the command line](#)

[Start Docker Desktop](#)

[Where to go next](#)

Open run

Type cmd

Run

Type the name of a program, folder, document, or Internet resource, and Windows will open it for you.

Open:

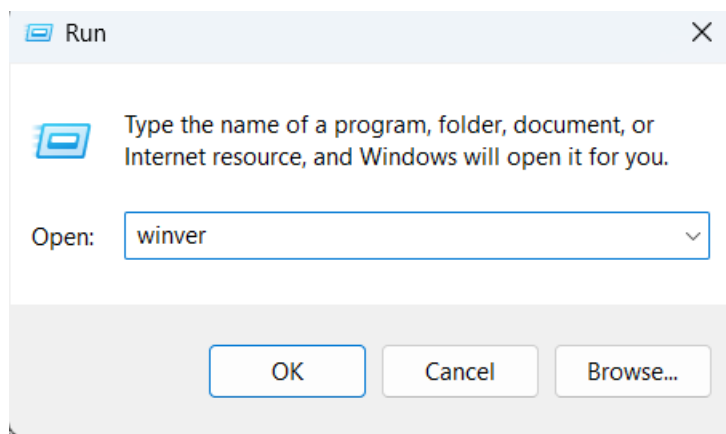

OK Cancel Browse...

Type in cmd wsl

Type wsl --install

```
C:\Users\priya>wsl --install
Downloading: Ubuntu
[ 1.3% ]
```

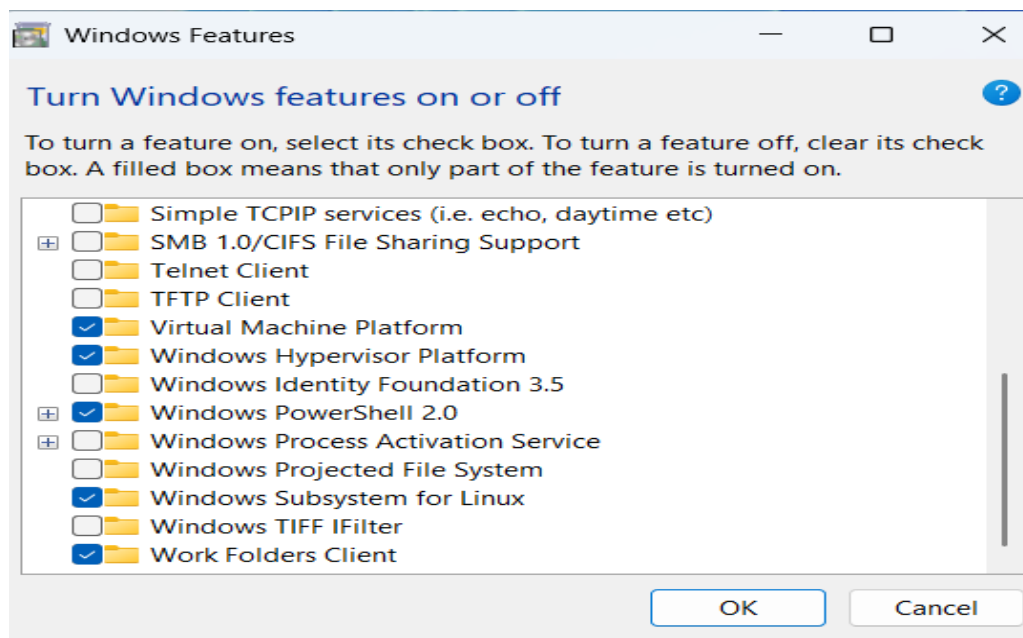

Open run

Open – turn windows features turn on off

Select windows sub-system for linux

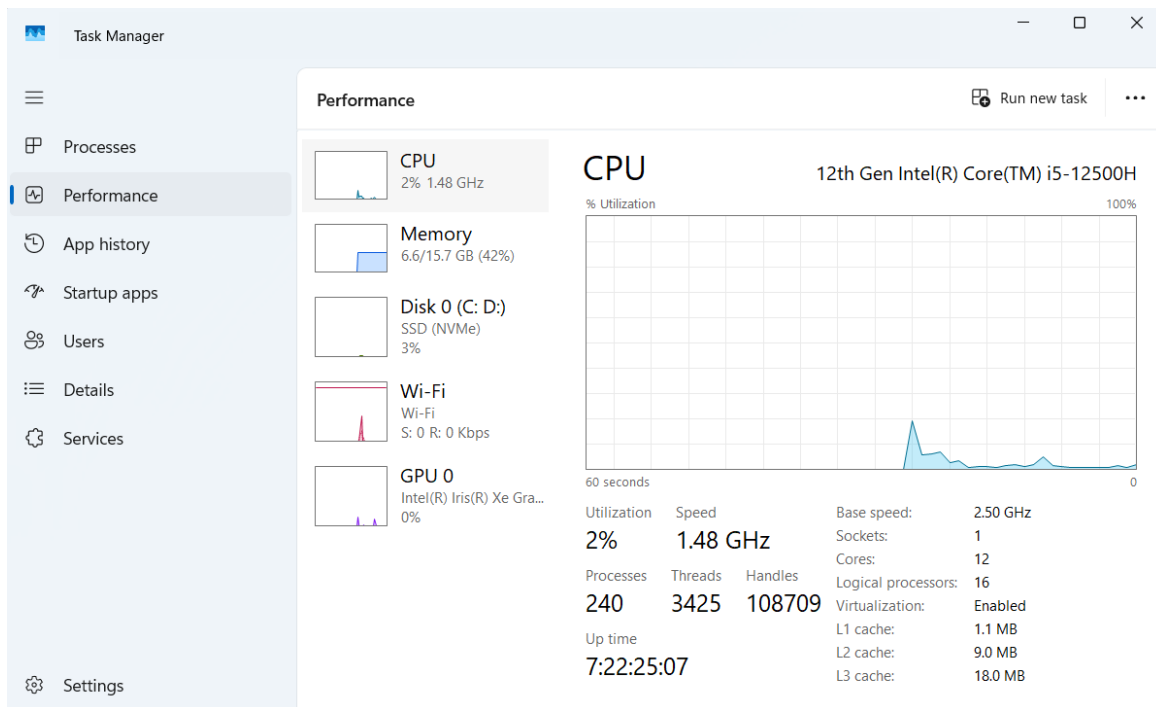

Open task manager

Select performance

Select CPU

Check virtualization enable

Open Download file Docker

Double click on Docker installer

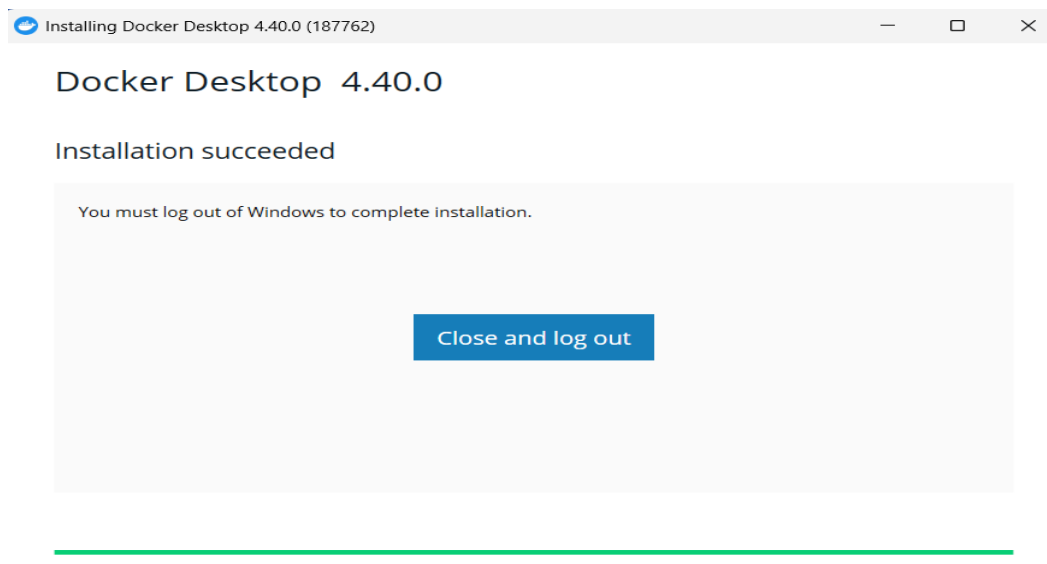

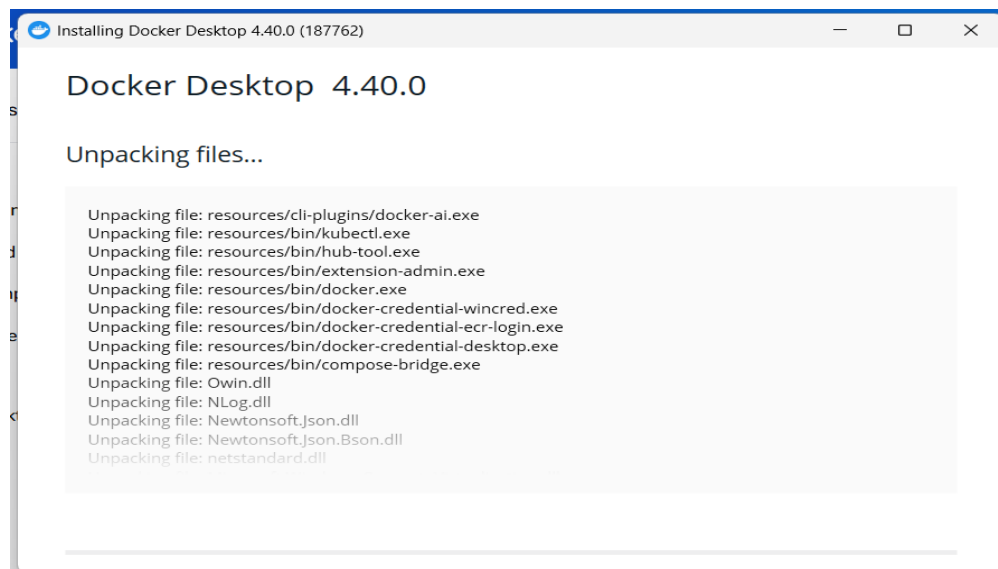

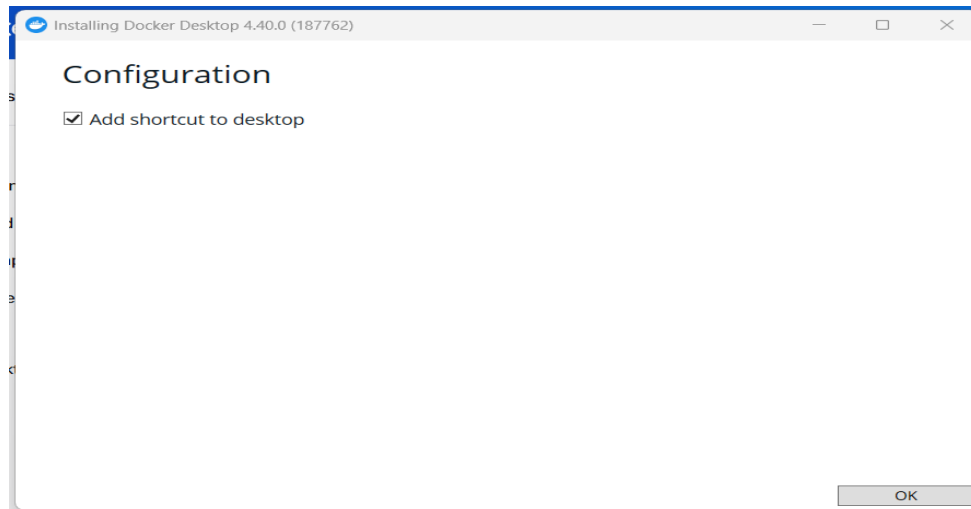

Complete installation

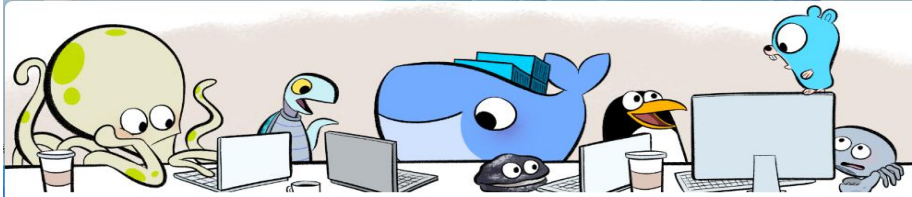

Open Docker icon in desktop

Click accept button

Select use recommended setting option

Click finish

Docker Subscription Service Agreement

By selecting **accept**, you agree to the [Subscription Service Agreement](#), <https://dockr.ly/3jixb1E>, [Docker Data Processing Agreement](#), and the [Data Privacy Policy](#).

Commercial use of Docker Desktop at a company of more than 250 employees OR more than \$10 million in annual revenue requires a paid subscription (Pro, Team, or Business). [See subscription details](#)
